RRF Update Report for reporting period February and March 2021

	RESOURCE RECOVERY FACILITY UPDATE REPORT				
File No:	WST/13-09				
Attachment/s:	Nil				
Date:	24 April 2021				
Prepared by:	DIRECTOR CORPORATE SERVICES				

This report presents a summary of activities that have taken place in the reporting period covering 1 February 2021 to 31 March 2021.

OPERATIONAL MATTERS

Week beginning 22nd March 2021 the facility undertook a one week scheduled shutdown to undertake maintenance activities with regard to Composter 2, secondary refining, maturation hall and general housekeeping. The shutdown was originally planned for April 2021 and was agreed to be bought forward a couple of weeks.

OPERATIONAL INFORMATION

Waste Delivery

Waste Delivery Summary for Reporting Period

MONTH	SCHEDULED TONNES	DELIVERED TONNES	DIFFERENCE TONNES
February 2021	8,000	8,122	122
March 2021	9,200	7,830	(1,370)

For the 12th Contract Year, for the period to 31 March 2021, the RRF was 2,297 tonnes ahead of schedule as a result of additional throughput at the plant.

The RRF is operating as anticipated in the RRFA, with average availability of 104% over the past 12 months.

On a monthly basis, Additional Tonnes (those tonnes greater than the monthly scheduled tonnes) only incur the Variable Operating Cost charge, but not the Capital Cost or Fixed Operating Cost charges.

Unavailable Tonnes (those tonnes less than the monthly scheduled tonnes) are not paid for unless:

- Within the Contract Year there is a positive balance of Additional Tonnes, these
 Additional Tonnes can be off-set against the Unavailable Tonnes. In this case, the
 off-set Additional Tonnes incur the full gate fee cost less the Variable Operating
 Cost (which has already been paid on the Additional Tonnes); or
- If the RRF Availability for a month is less than 92% of the monthly Scheduled Tonnes and there are no accumulated Additional Tonnes remaining to be off-set, then the MRC is required to pay the Capital Cost on all Unavailable Tonnes up to 92% of the monthly Scheduled Tonnes.

At the end of the Contract Year, if 100,000 tonnes of waste have been delivered to the RRF then the above "overs and unders" system should balance out.

The exception to the above is the tonnes not processed during the composter replacement.

The MRC entered into a standstill deed with BioVision which deals with the operations of the plant during this period. The tonnes scheduled for processing but not processed during the shutdown have been recorded as Accrued Tonnes. The MRC has already paid the capital cost component of the RRF Gate Fee in relation to these tonnes and so the Accrued Tonnes will be processed for the MRC at the end of the RRFA contract with the MRC only have to pay the fixed and variable components of the RRF Gate Fee.

Waste Diversion

Waste Diversion for the past six months (ended March 2021) was 44.1% against a Waste Diversion Target of 43.3%.

Community Complaints

BioVision is continuing engagement with the selected key stakeholders, in particular the Banksia Grove development and the Wanneroo Golf Course.
