NOTES FOR VARIATIONS - INCOME STATEMENT BY NATURE AND TYPE

Note # Description of Item Nature of variance where: 1. Member Revenue (Aggregated) variances greater than \$250,000. 2. Non Member Revenue (Aggregated) variances greater than \$100,000. 3. Other Revenues Charged (Per Line Item) variances greater than \$100,000. 4. All Expense variances (Per Line Item) greater than \$100,000. Total user charges year to date are above budget by \$141k due to more than anticipated member council's User Charges - Members and Non Members waste of \$16k, the main contributors being the Cities of Joondalup and Stirling. Non member waste being \$125k above budget due to unanticipated increased waste received from cash and trade customers. The Member Councils have delivered more processable tonnes (1,214t) and less non processable tonnes (734t) than budget year to date. The variances relate to higher processable tonnes and lower non processable tonnes received mainly from City of Wanneroo. RRF residues have delivered less than anticipated (453t) year to date. Other Revenue is \$148k above budget mainly due to receiving a refund from the ATO and a payment from C-Wise for profit sharing relating to the 2019-2020 financial year, both unbudgeted. This is abated by lower than Other Charges anticipated interest rates in investments and the net effect of lower income against budget as a result of Workpower taking over resource recovery operations from September 2020. RRF other operating expenses is \$1.238m above budget due to payment of fixed operating cost adjustment RRF Other Operating Expenses pertaining to the previous financial year and insurance cost catch-up payments for the period from 1 Jan 2020. Land lease/rental costs have been re-allocated in accordance with AASB16 Leases. All leases will be treated Land lease/Rental Costs as right of use asset and will depreciate and incur finance costs until the end of lease. DWER landfill levy is \$213k below budget due to 3,313 tonnes less levied waste being delivered against DWER Landfill Levy phased budget.

Tonnage Report to 30 November 2020

Item 9.1

APPENDIX 2

Item 9.1

Waste to Landfill Tonnages Report for the period to 30 November 2020

Members

The Member Councils' processable waste for the financial year to date is 1,214 tonnes above budget, mainly City of Wanneroo delivering more than anticipated to date. (1,207t).

The non processable waste for the year to date is 733 tonnes below budget primarily as a result of the City of Wanneroo (1,709t) delivering less than their estimated non processable tonnage, abated by the City of Stirling who have delivered more than anticipated. (985t)

These variances leave the MRC marginally above in its budgeted waste receipts (0.03%) from Member Councils for the financial year to date. Overall the Member Council waste is 27 tonnes above budget as at the end of November 2020.

RRF

The Resource Recovery Facility residue tonnes are below budget (453t) for the financial year to date.

Trade & Casual

The Casual and Trade tonnages in total are 732 tonnes above budget for the financial year to date. Trade tonnages exceeding budget (888t) year to date and cash customers marginally below budget (155t)

Overall for the period ended 30th November 2020, the tonnes received are 760 tonnes above budget.

List of Payments made to 30 November 2020

MRC WASTE PLAN

Item
9.3

APPENDIX 4

Item
9.3

Regional council waste plan

Mindarie Regional Council

Part 1 - services and performance 1.0 Introduction

Part 1 of the Mindarie Regional Council waste plan establishes a waste profile and baseline information in relation to the objectives and targets set out in the *Waste Avoidance and Resource Recovery Strategy 2030* (Waste Strategy):

Avoid¹ - Western Australians generate less waste.

Recover - Western Australians recover more value and resources from waste.

Protect - Western Australians protect the environment by managing waste responsibly

NB: Regional local government² (commonly referred to as regional councils) waste plans are designed to cover the myriad of different operational/education/service functions offered. As a result, some sections of regional council waste plan templates may/may not be applicable to a regional council.

Where data was available, the Department of Water and Environmental Regulation (DWER) has pre-filled sections of Part 1. If any of the pre-filled information is incorrect, please amend accordingly and advise of the changes.

Please take the time to ensure that you complete each section, where relevant. In some tabs, you may need to scroll down to ensure that you have not missed any sections.

¹ As explained in tab 'P1 - 3 Avoid', baseline information relating to the 'avoid' strategy is not required from regional councils at this stage.

² The definition in section 3(1) of the *Waste Avoidance and Resource Recovery Act* 2007 of local government includes "a regional local government established for the purpose of providing waste services". A regional local government is established under section 3.61 of the *Local Government Act* 1995, which provides in section 3.61(1):

Two or more local governments (referred to in this Division as the participants) may, with the Minister's approval, establish a regional local government to do things, for the participants, for any purpose for which a local government can do things under this Act or any other Act.

Part 1 - Services and performance 2.0 Integrated planning and reporting

All local governments, including Regional Councils, plan for the future ¹ through the development of strategic community plans and corporate business plans. Waste plans for part of local government integrated planning and reporting as an issuespecific informing strategy.

Table 1: Links between plan for the future and waste management (Please complete the table, even if the answer is "waste isn't mentioned in your SCP or CBP")

Strategic Community Plan	
Title:	Strategic Community Plan 2018 - 2037
Came into force:	2018
Date of next review:	Currently under review (2020-2021)
Waste-related priorities:	Effective and Sustainable Waste Management (Objectives 2.1, 2.2, 3.1, 3.2, 3.3)
Corporate Business Plan	
Title:	Corporate Business Plan 2018 - 2037
Came into force:	2018
Date of next review:	Currently under review (2019-2020)
Waste-related priorities:	Industry leading waste management and practices; improving resource recovery and waste diversion; engaging with new opportunities to achieve an optimal mix of waste solutions; and being an effective advocate for improved waste outcomes. Incorporation of Waste Strategy 2030 priorities will be given consideration during the Plan reviews. It should be noted that the MRC has recently undergone a business restructure and no longer provide waste education services and have appointed WorkPower to operate the Reuse Shop and Recycling / Drop off facilities at its Tamala Park facility.

¹ 'Plan for the future' means a plan made under section 5.56 of the *Local Government Act 1995* and Division 1 and 3 of Part 5 of the Local Government (Administration) Regulations 1996.

Part 1 - Services and performance 3.0 Avoid

Avoidance of waste generation is the preferred waste management option in the waste hierarchy. The state's waste generation reduction targets from the baseline year of 2014-15 are - **2025**: Reduction in MSW generation per capita by 5%, and **2030**: Reduction in MSW generation per capita by 10%.

At this stage, Regional Councils are not required to provide baseline information related to the 'avoid' targets. However, if there is specific information collected by your regional council that provides a baseline for future waste planning and is related to the 'avoid' strategy and targets, please provide this in the "Additional comments" box below. For example, a regional council may be part of a committee/group that focuses on waste avoidance; or may implement programs that encourage community behaviour change in terms of waste generation. Such information may indicate how waste generation has changed, identify potential reasons for change and indicate areas to target in *Part 2 - Implementation plan (Table 17)*.

Additional comments (regional council to insert any additional comments that may be applicable)
The MRC's Tamala Park Reuse shop and recycling area is a key initiative where many tonnes of material have been diverted from landfill for
re-use or recycling. Importantly, these re-use items are put back into the community for beneficial use and avoids procurement of new items.

Part 1 - Services and performance 4.0 Recover

Where waste generation is unavoidable, efforts should be made to maintain the circulation of materials within the economy. The overall recovery rate of each facility operated by Mindarie Regional Council should be provided in Table 2 and compared with the overall recovery target rate contained in the Waste Strategy.

Table 2: Overall recovery rate (%) of each facility operated by Mindarie Regional Council compared with targets for 2020, 2025 and 2030 (RC to complete the table. Add additional comments if required.)

	2014-15	2015-16	2016-17	2017-18	2020 target	2025 target	2030 target
Neerabup RRF	51%	49%	53%	51%	Perth and Peel: 65%	Perth and Peel: 67%	Perth and Peel: 70%

The Waste Strategy includes a target that from **2020**, energy should only be recovered from residual waste. Regional councils should explain how they plan to meet this target in *Part 2 - Implementation plan* (Table 17).

Table 3 shows the recovery rate of waste services provided by Mindarie Regional Council directly to households that do not result in the waste being transported to or processed by a facility operated by Mindarie Regional Council.

For example, a regional council may engage a contractor to collect specific household waste (e.g. mattresses) on behalf of member councils. The waste is then sent to another facility for disposal or recovery. The recovery rate from this service will not be reflected in Table 2 above, and should be displayed in Table 3 below. The "Comments" column should be used to describe the type of service provided.

Table 3: Overall recovery rate (%) from services provided directly to households by Mindarie Regional Council compared with targets for 2020, 2025 and 2030 (RC to complete the table if these services are provided and information is available. Add additional compants if required.)

	2014-15	2015-16	2016-17	2017-18	Comments	2020 target	2025 target	2030 target
Mattress Processing	169	307	299	234	Mattresses delivered to Tamala Park, processed offsite by external provider who advises 70% recovery.	Perth and Peel: 65%	Perth and Peel: 67%	Perth and Peel: 70%
E-waste	E-waste 128 116 191 193 E-waste delivered to Tamala Park, processed offsite by external provider who advises 95% recovery							
Paint (Paintback)	110	100	95	119	Household Paint included in the product stewardship and advises 97% recovery			
Green Waste	ND	218	1505	795	Green waste is delivered to Tamala Park and processed offsite by external provider who advises 100% recovery.			
Expanded Polystyrene	ND	ND	10	8	EPS delivered to Tamala Park undergoes onsite processing with heat and pressure to form blocks which are shipped to international markets at no loss i.e. 100% recovery.			
HHW Chemicals	25	23	39	34	HHW Chemicals delivered to Tamala Park, processed offsite by external provider who advises 97% recovery			
Dry Cell Batteries	5	14	15	14	Dry Cell Batteries delivered to Tamala Park, processed offsite by external provider who advises 97% recovery			
Compact Fluoro Lamps (CFL)	1	4	2	3	CFLs delivered to Tamala Park, processed offsite by external provider who advises 97% recovery			
Scrap Metal	2992	4433	3269	2138	Scrap Metal is delivered to Tamala Park and captured in dedicated skip bins and recovered from landfill deliveries. It is processed offsite by external provider who advises 97% recovery			
Tyres	66	62	61	83	Tyres received at Tamala Park are collected and processed offsite by external provider who advises 100% recovery			

Additional comments (regional council to insert any additional comments that may be applicable)

Table 2: The Neerabup RRF has historically had contractual obligations to achieve 51% waste diversion / recovery through the process, which has now reduced to 43.1%. The facility received 105,657; 76,126; 106,463; 110,800 tonne of MSW per annum for each of the reporting years respectively.

This recovery rate can only be increased through lower contamination in the MSW feedstock which is unlikely with the GO and/or FOGO component being eventually redirected to alternate processing.

Table 3 Figures are tonnages received at Tamala Park, consolidated and sent to external providers for processing and recovery. The tonnages of CFL and Dry Cell Batteries are expected to significantly reduce in the future since our community battery collection services no longer occur.

The MRC Tamala Park Waste Management Facility accepts household hazardous waste, greens, metal, tyres, oils, cardboard, white goods, air conditioners, polystyrene, batteries and small recyclables (CFLs, mobile phones, ink cartridges). These materials are sent to external providers for recovery and beneficial reuse. The % figures and targets are not relevant to our operations as the volume of available materials is not readily known to a reasonable degree of certainty.

WorkPower, on behalf of the MRC, conduct the onsite management of the E-waste, Paint, Expanded Polystyrene, HHW Chemical, Dry Cell Batteries, CFL's and a large proportion of the scrao metal.

Part 1 - Services and performance

5.0 Protect

Objective 3 of the Waste Strategy is to protect the environment by managing waste responsibly, with targets based on better practice, litter and illegal dumping: By 2030 all waste is managed by and/or disposed to better practice facilities, by 2030 move towards zero illegal dumping and zero littering

5.1 Better practice

Adoption of better practice approaches to waste management is an important way in which Regional Councils can better protect the environment from the impacts of waste, and contribute to achievement of the targets under objective 3 of the Waste Strategy. See *Guidance Document - 5.0 Better practice, Table 4* for a summary of the Waste Authority's current and planned better practice guidelines.

Table 4: Better practice approaches and programs adopted by Mindarie Regional Council (RC to complete the table)

Waste management activity/service	Waste Authority better practice guideline or program	Date of adoption/ implementation	Comment
	Waste Authority Position Statement on Source Separation	1991	Recoverable material is collected separately to improve recovery.
	WALGA Better Practice Reuse Shop Guidelines	1991	Available undercover retail space doubled in size during 2018 upgrade. Diverting waste from landfill. Wining back waste. Operated by WorkPower on behalf of the MRC.
HHW Facility	HHW Program	2008	Historically the largest HHW Facility in terms of volume accepted. Operated by WorkPower on behalf of the MRC.

5.2 Litter

Information on littering within Mindarie Regional Council should be detailed in Table 5 where available.

Table 5: Litter information (RC to complete the table if relevant and information is available.)

	Response and comments
Current measures aimed at contributing towards the zero littering target	The MRC have installed litter fencing throughout the landfill operations and routinely conduct litter picking within the Tamala Park cadastral boundary
	Site inspections are conducted regularly to determine the effectiveness of the control measure and if any further action is required.
	Litter management within the Tamala Park Waste Management Facility is highly important (score of 5)

Additional comments (regional council to insert any additional comments that may be applicable)

It should be noted that the litter is only managed at Tamala Park not in public spaces.

5.3 Illegal dumping

Information on illegal dumping within Mindarie Regional Council should be detailed in Table 6 where available.

Table 6: Illegal dumping data (RC to complete the table if relevant and information is available.)

	Response and Comments
Current measures aimed at contributing towards the zero illegal dumping target	Not Applicable
How does your Regional Council measure the effectiveness and impact of	Quantities of Asbestos and other recyclables are recorded.
How high a priority is illegal dumping management to your organisation? (1 - Not important at all; 5 - Highly important). If you have additional comments in relation to this rating, include these.	

Additional comments (regional council to insert any additional comments that may be applicable

The MRC provide free asbestos day disposal and free drop off for particular recyclables and reusable item at Tamala Park Waste Management Facility which encourages recovery over illegal dumping. Commercial Asbestos deliveries have grown from 8 tonne in 2014-2015 to 458 tonnes in 2017-2018. Comparatively the Free Asbestos delivered tonnages have grown from 99 tonne in 2014-2015 to 130 tonnes in 2017-2018.

Part 1 - Services and performance

6.0 Waste management tools

6.1 Waste services

Regional council data relating to the waste collected, recovered and landfilled should be presented in Table 7. These figures reflect the waste that is received at all facilities operated by Mindarie Regional Council, apart from "Special household services". It is important to review this data when developing Part 2 - Implementation Plan (Table 17), as it can:

- provide an understanding of how different systems are performing (e.g. recovery levels)
- highlight the need for any new collection systems or infrastructure
- identify the timing and capacity of any new collection systems or facilities required to meet the changing needs of local governments.

In working towards alignment with the Waste Strategy, the council should focus on the materials/resources with the greatest potential to support the objectives and targets of the Waste Strategy.

NB: DWER is currently developing a range of better practice guidelines. Better practice rates will need to be updated as the guidelines are released.

Table 7: Significant sources and generators of waste in2017-18 (RC to complete table. Add additional comments if necessary.)

Sei	rvice/Sources	Tonnes collected	Tonnes recovered	Recovery rate	Better Practice rate	Target rate 2025	Target rate 2030
	mixed waste	Not Applicable	Not Recorded	Not Applicable			
	dry recyclables	2731	2731	100%

	hard waste	Not Applicable	Not Applicable				
	green waste	Not Applicable	Not Applicable				
Special services	specific product collection (e.g. e-waste, mattresses, white goods)	Detailed in the Drop-off figures	Detailed in the Drop-off figures				
TOTAL		5212.57	5142.721				

¹ The figures for special household services should reflect services provided directly to households by the Regional Council on behalf of member councils that do not result in that waste being transported to or processed by a facility operated by the regional facility.

Additional comments (Regional Council to insert any additional comments that may be applicable)

Mixed Waste - definition required. All residual waste received at Tamala Park is landfilled.

Dry recyclables - is a sum of the following individual fractions which could be provided separately - Aluminium, Copper, Glass, Metal,

Paper/cardboard, Plastic, Polystyrene received at Tamala Park

Hazardous Waste - is a sum of the following individual fractions - hazardous, batteries, fire extinguishers, fluoro's, gas bottles, oil, paint

No Garden organics or FOGO bin audits have been undertaken by the MRC.

able 8 Audit Data is summary data from all MRC member councils combined.

Table 8 provides space for the Regional Council to include bin audit information for kerbside waste services, if available. Bin audits can help councils understand the material composition in kerbside bins, highlight where additional efforts are required to increase performance and assist in planning for future service options such as FOGO collection. See Appendix for full breakdown of composition categories.

Table 8: Compositional audit data for kerbside waste services(RC to complete table if data is available.

Add additional comments if necessary.)

Part 1 - Services and performance

6.0 Waste management tools

6.2 Waste infrastructure

The number, type, capacity and location of key existing regional council owned and/or operated waste and resource recovery infrastructure is required to understand the future need for different facility types. The range of infrastructure used by Mindarie Regional Councilo manage waste is detailed in Table 9.

Table 9: Current waste and resource recovery infrastructure operated by the regional council (RC to review and complete the table)

Facility name (and licence number if applicable)	Facility Type	Location	Managed by	Licence category and approved production or design capacity	Material type	Service/activity	Remaining Capacity (if applicable)	Anticipated Closure (year)

Table 10 provides space for regional councils to provide information about planned waste and resource recovery infrastructure, if relevant.

Table 10: Planned waste and resource recovery infrastructure (RC to complete the table)

Location	Managed by	Licence category and approved production or design capacity (if known)	Waste type	Service/activity	Estimated operation start date
No additional planned infrastructure at this point in time					

Additional comments (Regional Council to insert any additional comments that may be applicable)

A strategic review is underway which will feed into a new Strategic Community Plan and Corporate Business Plan. Current infrastructure and services will continue as is until this review is completed. Future use and closure dates for existing infrastructure and services are still to be determined. Additional infrastructure and services may or may not come online thereafter.

Part 1 - services and performance

6.0 Waste management tools

6.3 Policy and procurement

6.3.1 Contracts

Information on Mindarie Regional Council's existing waste contracts should be detailed in Table 11. When reviewing services, it is a good opportunity to evaluate how they are performing, opportunities for regional collaboration and to identify any opportunities for improvement, review or renegotiation.

Table 11: Existing waste management contracts (RC to complete the table)

Contractor	Services		Contract commencement and expiry	Notes/comments
BioVision 2000 Pty Ltd	Operation and Maintenance of the Neerabup Resource Recovery Facility, converting MSW to soil improver	Meeting KPI's Services are also utilised by Member Councils	20 year contract. Expires in 2030	Bespoke treatment solution for 2 bin system residue waste.
Total Green Recycling Pty Ltd	E-Waste Recycling Services	Meeting KPI's	November 2020. Expires November 2024 if both 1 year extensions are exercised.	
Sims Group Australia	Scrap Metal Recycling	Meeting KPI's	August 2017. Expires August 2021	
		Meeting KPI's		
Soft Landing	Mattress Recycling	Service agreement also utilised by Member Councils	August 2018. Expires August 2021.	
WALGA	Household Hazardous Waste Processing	Meeting KPI's	2018. Expires 2023	
Paintback Limited	Paint Processing (PBL Stewardship Scheme)	Meeting KPI's	August 2017. Expires Aug 2021	Non-scheme paint is processed via the WALGA Household Hazardous Waste Program
Western Tree Recyclers	Green Waste Processing		Dec 2015. Expires Dec 2022 if both 1 year options are exercised.	

6.3.2 Waste local laws and policies

Information on Mindarie Regional Council's existing local laws, strategies or policies that may complement/support this waste plan and contribute to the Waste Strategy objectives should be detailed in Table 12.

Table 12: Existing waste-related local laws, strategies and policies (RC to complete the table)

Type of local law, strategy or policy	Name of local law, strategy or policy	Came into force	Due for review	Comments
Local Law	Mindarie Regional Council Waste Facility Local Law 2020	Pending - anticipate by March 2021	2028	Adoption is still subject to formal gazetting.

6.3.3 Sustainable procurement

Regional councils can be significant consumers whose purchasing decisions and procurement policies can have positive impacts. This section reviews activities relating to procurement of infrastructure, goods and services that avoid waste, promote resource recovery or encourage greater use of recyclable and recycled products. Information on existing sustainable procurement policies or practices that may contribute to the Waste Strategy objectives should be detailed in Table 13.

Table 13: Existing sustainable procurement policies and practices (RC to complete the table)

Sustainable procurement policy or practice	Date adopted by council	Actions implemented e.g. switching to recycled printer paper	Alignment with Waste Strategy targets, objectives or focus materials
No formal policy			

Additional comments (Regional Council to insert any additional comments that may be applicable)

Table 13 - The MRC have developed a Recycled Concrete Products Policy template for use by its member councils and an action has been included in the Implementation Plan to develop a sustainable procurement policy, subject to completion of the Strategic Community Plan and Corporate Business Plan review.

Part 1 - services and performance

6.0 Waste management tools

6.4 Behaviour change programs and initiatives

Communication and engagement with waste generators and managers underpins many local government waste management activities, and are vital in driving behaviour change needed to achieve the objectives and targets of the Waste Strategy.

Behaviour change programs and initiatives refers to activities that increase awareness, skills and knowledge; provide consistent messaging; help people to use waste infrastructure; and encourage the adoption of specific, positive waste behaviours and attitudes.

Most Regional Councils have existing behaviour change programs and initiatives and it is important to evaluate their effectiveness. This section includes an opportunity for a high level qualitative assessment process to understand what has worked and what has not. The results can be used to inform actions for Part 2 – Implementation plan (Table 17).

Information on Mindarie Regional Council's existing waste behaviour change programs or initiatives should be detailed in Table 14. This may include participation in Waste Authority funded programs, or programs/initiatives run by Mindarie Regional Council .

Table 14: Behaviour change programs and initiatives, including Waste Authority programs and other Regional Council initiatives C to complete the table)

Regional Council program/initiative	Details of evaluation method e.g. qualitative/quantitative a sesesment		What's worked/not worked	Suggested improvements
Not Applicable				

Additional comments	(Regional	Council to insert an	y additional comments that ma	y be applicable)
---------------------	-----------	----------------------	-------------------------------	------------------

The MRC recently ceased providing waste education services for the community and its member councils. This service is now being conducted directly by each member council individually.

6.5 Data

Table 15 provides an opportunity to assess existing waste data practices, identify strengths and gaps and consider the kinds of data activities which could be included in the Part 2 – Implementation Plan to improve the local government's waste data. It should be completed based on the data/information covered in Part 1 of this document, as well as the individual experience of the officer/s responsible for collecting and using waste data.

Where 'no', please comment on:

- the kinds of data that is missing, where data gaps exist
- barriers to collecting or accessing adequate data
- the kinds of data collection, analysis or reporting practices that are not currently in place which would assist local government waste management functions.

Table 15: Assessment of waste data (RC to complete the table)

Please ✓

		ise ₹					
	YES	NO	Comment				
Does the Regional Council have access to adequate waste data to complete Part 1 of the waste plan?		tick	Good data is captured for waste delivered to landfill, items received for recycling and waste recovered from processing at Neerabup RRF. Data related to avoid and reuse aspects of the strategy have signficant data gaps which are difficult to measure and possibly beyond MRC remit.				
Does the Regional Council use waste data when undertaking planning activities for waste projects/programs? Does the Regional Council have access to adequate waste data for this purpose?	tick	tick	We use data captured from member council kerbside bin audits and material delivered to Tamala Park. This data is adequate for the MRC's current needs and will be reviewed as part of the Strategic Community Plan and Coporate Business Plan reviews.				
Does the Regional Council use waste data when monitoring or assessing waste projects/programs? Does the Regional Council have access to adequate waste data for this purpose?	tick	tick	Data gathering and processing is expensive and time consuming. The requirement to capture further data to meet the MRC's future needs will be reviewed as part of the Strategic Community Plan and Coporate Business Plan reviews.				
Does the Regional Council use adequate waste data to measure progress toward the targets and objectives of the Waste Strategy? Does the Regional Council have access to adequate waste data for this purpose?	tick	tick	Adequate data is available with regard to waste going to landfill and recyclables received. Little data available for avoid and recover. E.g.: Being asked to implement FOGO, little data available on market size and demand for product, available processing infrastructure, etc.				
Does the Regional Council have access to adequate waste data to fulfil annual data reporting obligations under the WARR Regulations? (previously undertaken through the Waste and Recycling Census)	tick		Yes the MRC provides its data to complete the census submissions.				
Are there any types of waste data that the Regional Council does not currently collect or have access to that would be helpful/useful?		tick	Since the business restructure the MRC has adequate data for its current programs and activities. This will be reviewed as part of the Strategic Community Plan and Coporate Business Plan reviews.				
Are there any ways which Regional Council waste data collection, storage or use could be improved?		tick	Adequate data is captured for MRC's existing needs. This will be reviewed as part of the Strategic Community Plan and Coporate Business Plan reviews.				
Is the data collected by the Regional Council accurate? Are any new strategies needed to improve accuracy?	tick		Accurate to the level required by the organisation. this will be reviewed as part of the Strategic Community Plan and Coporate Business Plan reviews.				
Does the pre-filled data provided in this template align with the data the Regional Council has? i.e. is this pre-filled data accurate?	tick		The basic information is in most cases correct however some information has been updated where required.				
Any additional comments?	tick		Data capture and analysis is expensive and time consuming and can be often bigger than the project itself. Yes it is important and supports the project however is only captured on an as needed basis. Funding and support service will assist in greater capture of data where this data is not critical to the success of the project outcomes.				

Part 1 - services and performance

7.0 Summary

The purpose of *Part 1* of the waste plan is to consolidate information about current waste management practices, to enable you to assess and identify:

- current waste management performance
- alignment between current waste management practices and the Waste Strategy
- strengths and successes, as well as gaps and opportunities for improvement.

Table 16. provides space to analyse the data and information presented in *Part 1*, and should be used to determine waste management priorities for the short, medium and long term, and translate these priorities into actions in *Part 2 – Implementation plan* (Table 17).

Table 16: Assessment of waste management performance and prioritisation of future actions (RC to complete the table)

Tamala Park Landfill operates as a best practice landfill and has been used as a benchmark for industry. Waste management achievements (for example, RRF (composting) enables member councils to have achieved high landfill diversion targets with performance/achievement against Waste Strategy a two bin system. Reuse shop continues to promote reuse ethos and diversion from landfill. targets or objectives or where particular waste management objectives have already been met) Drop off and Recycling increasing recovery through participation in support of product stewardships (NCTRS, MobileMuster, PaintBack, Tyre Stewardship Australia). Possible adoption of EfW services for residual waste as a higher order waste hierarchy option. Opportunities for improvement (for examples, More convenient drop off/collection services throughout the MRC region for a greater range of where performance against Waste Strategy targets products (HHW, e-waste, CDS, furniture & other reuse items). or objectives could be improved or where waste management objectives have not been met) The above opportunities would require Council approval prior to implementation. Ongoing (activities currently under way and/or continuously undertaken) Landfill, drop off, transfer station, Reuse shop, recycling, Neerabup RRF. Short term (within the next 1-2 years) Potentially as above, although outcomes of the strategic planning could expand or contract any of the above items. Establish a Container Deposit Scheme Donation Point at Tamala Park. NOTE: All above is dependant on final review and approval by Council of Strategic Community Priority areas for action in Part 2 -Plan and Corporate Business Plan. Implementation plan Medium term (within the next 3-5 years) Currently undertaking a strategic review of all MRC operations and activities. Long term (more than five years) Currently undertaking a strategic review of all MRC operations and activities.

Part 2 - DRAFT Implementation plan

GLOSSARY

Avoidance	Avoidance refers to the prever waste hierarchy.	Avoidance refers to the prevention or reduction of waste generation and is the most preferred option in the waste hierarchy.					
Better practice	Better practice refers to practices and approaches that are considered by the Waste Authority to be outcomes-focussed, effective and high performing, which have been identified based on evidence and benchmarking against comparable jurisdictions						
Commercial and industrial waste (C&I)	olid waste generated by the business sector, State and Federal Government entities, schools and tertiary stitutions.						
Commercial waste services	 Refers to drop-off, kerbside, vergeside or other waste services provided by the local government to commercial premises. Discretionary service, not offered by all local governments 						
Construction and demolition waste (C&D)		Solid waste produced by demolition and building activities, including road and rail construction and naintenance, and excavation of land associated with construction activities.					
Disposal	route.	harge of waste into the environment, either into landfill or another disposal rred option in the waste hierarchy.					
Drop-off facilities and services	 Drop-off collections are where reportable waste is delivered to the waste depot (drop-off facility) by the residents of the local government i.e. self-hauled waste. Services are provided to collect waste or recyclable materials. May be temporary or permanent standalone drop-off points for one or more materials, or may form part of other waste facilities (such as landfills or transfer stations). 						
	Note: this does not include HHW drop-off points						
Energy recovery	The process of extracting ener recovering energy from waste	The process of extracting energy from a waste stream through re-use, reprocessing, recycling or recovering energy from waste					
Household hazardous waste (HHW) facility	 Refers to facilities for the drop-off and storage of HHW Includes consideration of the drop-off and storage procedures and infrastructure, staffing and resourcing, layout, operation and management HHW facilities, etc. 						
	49A of the Environmental Prot	rised discharging or abandonment of waste and is an offence under Section ection Act 1986. erally considered to have the following attributes:					
	Volume	> 1 cubic metre					
Illegal Dumping	Environmental impact	Contains items/substances that are potentially noxious or hazardous; potential for environmental harm if material leaks, spreads or degrades					
	Type of waste	Commercial or industrial waste; larger-scale household waste					
	Reason for offence Premeditated decision; commercial benefit or avoidance of fee						
	Mode of deposition Deposited using a vehicle						
Kerbside waste services	A regular, containerised collection service (often a wheelie bin) where the waste or recycling is collected from outside a resident's dwelling.						
Nerbside waste services	Can apply to either recycling or general waste (and in a few instances green waste).						
		le waste, registered or licensed landfills					
Activities related to the layout, operation, management and post closure of a landfill. Includes consideration of the technology and infrastructure on site, staffing and resourcing other waste facilities or services at the landfill site (e.g. greenwaste or recycling drop off, mul shop, etc.)							

GLOSSARY

	Litter is defined in the Litter Act 1979 as including:						
	all kinds of rubbish, refuse, junk, garbage or scrap; and						
	any articles or material abandoned or unwanted by the owner or the person in possession thereof,						
	but does not include dust, smoof any mining, extractive, prima	oke or other like products emitted or produced during the normal operations ary or manufacturing industry.					
Litter	Litter is generally considered to have the following attributes:						
	Volume	< 1 cubic metre					
	Environmental impact	Nil or minor actual or potential environmental impact					
	Type of waste	Personal litter					
	Reason for offence	Unpremeditated, convenient disposal					
	Mode of deposition	Deposited by hand (includes dropping by hand from a vehicle)					
	Refers to waste generated	Refers to waste generated by a local government in performing its functions					
Local government waste management	 Includes materials such as construction and demolition waste from road and footpath building an maintenance; greenwaste from parks maintenance; waste generated at local government offices, of and facilities 						
Municipal solid waste (MSW)	Solid waste generated from domestic (residential) premises and local government activities						
Peel region	The Peel region is the area defined by the Peel Region Scheme.						
Perth metropolitan region	The Perth metropolitan region or the Perth region is the area defined by the Metropolitan Region Scheme.						
Public place services	Public place waste services refers to permanent bins provided by local government in public places to collect waste and/or recycling.						
Recovery	The process of extracting materials or energy from a waste stream through re-use, reprocessing, recycling or recovering energy from waste.						
Reuse	Reuse refers to using a materi	al or item again.					
Reprocessing	Reprocessing refers to using an item or material that might otherwise become waste during the manufacturing or remanufacturing process.						
Recycling	The process by which waste is collected, sorted, processed (including through composting), and converted into raw materials to be used in the production of new products.						
	Waste that remains after the application of a better practice source separation process and recycling system, consistent with the waste hierarchy as described in section 5 of the WARR Act.						
Residual Waste	Where better practice guidance is not available, an entity's material recovery performance will need to meet or exceed the relevant stream target (depending on its source - MSW, C&I or C&D) for the remaining non-recovered materials to be considered residual waste under this waste strategy.						
Special event waste services		nent refers to temporary bins and/or waste collection services provided by vaste generated at events such as fireworks displays, music festivals, sports					

GLOSSARY

Sustainable procurement	Sustainable procurement involves meeting a need for goods and services in a way that achieves value for money and generates benefits not only to the organisation, but also to society and the economy, while minimising damage to the environment.
Transfer station	 Refers to facilities which undertake large scale consolidation of waste or recyclable materials for transfer to another facility for processing or disposal Activities related to the layout, operation and management of a transfer station Includes consideration of the technology and infrastructure on site, staffing and resourcing, and any other waste facilities or services available at the site (e.g. greenwaste or recycling drop off, mulching, tip shop, etc.)
Vergeside waste services	 Vergeside collection services are bulk, infrequent (~every 4-6 month or on demand) services. Material is collected from residential 'vergesides' either non-containerised or in a skip provided by the local government. Vergeside services may relate to green waste or hard waste Includes waste and/or recyclable materials that may be mixed or separated and the source and can include green waste or hard waste.
Waste services	Waste services are defined by the Waste Avoidance and Resource Recovery Act 2007 as the: • the collection, transport, storage, treatment, processing, sorting, recycling or disposal of waste; or • the provision of receptacles for the temporary deposit of waste; or • the provision and management of waste facilities, machinery for the disposal of waste and processes for dealing with waste.
