RRF Update Report for reporting period November 2020

RESOURCE RECOVERY FACILITY UPDATE REPORT	
File No:	WST/13-09
Attachment/s:	Nil
Date:	22 December 2020
Prepared by:	DIRECTOR CORPORATE SERVICES

This report presents a summary of activities that have taken place in the reporting period covering 1 November 2020 to 30 November 2020.

OPERATIONAL MATTERS

The site operated under normal operating conditions during the month 2020 with extra COVID-19 precautions in place.

The site commenced a scheduled maintenance one-week shutdown in month, to undertake maintenance activities. The maintenance conducted was mainly on the cranes, compactors and also included scheduled general housekeeping.

There was an unscheduled down time due to an electrical fault on one of the RRF's composters. The facility had a reduced processing capability for two days.

OPERATIONAL INFORMATION

Waste Delivery

Waste Delivery Summary for Reporting Period

MONTH	SCHEDULED TONNES	DELIVERED TONNES	DIFFERENCE TONNES
November 2020	6,400	6,946	546

For the 12th Contract Year, for the period to 30 November 2020, the RRF was 3,112 tonnes ahead of schedule as a result of additional throughput at the plant.

The RRF is operating as anticipated in the RRFA, with average availability of 107% over the past 12 months.

On a monthly basis, Additional Tonnes (those tonnes greater than the monthly scheduled tonnes) only incur the Variable Operating Cost charge, but not the Capital Cost or Fixed Operating Cost charges.

Unavailable Tonnes (those tonnes less than the monthly scheduled tonnes) are not paid for unless:

- Within the Contract Year there is a positive balance of Additional Tonnes, these Additional Tonnes can be off-set against the Unavailable Tonnes. In this case, the off-set Additional Tonnes incur the full gate fee cost less the Variable Operating Cost (which has already been paid on the Additional Tonnes); or
- If the RRF Availability for a month is less than 92% of the monthly Scheduled Tonnes and there are no accumulated Additional Tonnes remaining to be off-set, then the MRC is required to pay the Capital Cost on all Unavailable Tonnes up to 92% of the monthly Scheduled Tonnes.

At the end of the Contract Year, if 100,000 tonnes of waste have been delivered to the RRF then the above “overs and unders” system should balance out.

The exception to the above is the tonnes not processed during the composter replacement.

The MRC entered into a standstill deed with BioVision which deals with the operations of the plant during this period. The tonnes scheduled for processing but not processed during the shutdown have been recorded as Accrued Tonnes. The MRC has already paid the capital cost component of the RRF Gate Fee in relation to these tonnes and so the Accrued Tonnes will be processed for the MRC at the end of the RRFA contract with the MRC only have to pay the fixed and variable components of the RRF Gate Fee.

Waste Diversion

Waste Diversion for the past six months (ended November 2020) was 46.7% against a Waste Diversion Target of 43.3%.

Community Complaints

BioVision is continuing engagement with the selected key stakeholders, in particular the Banksia Grove development and the Wanneroo Golf Course.
